

Please reject the NAB's petition 04-160. I feel that I should have the right to choose the programming I hear and how I hear it. If the NAB is so worried about XM taking over their local programming, have them stop whining to the federal government and have them instead actually try to better their programming. I travel in areas where without XM's content, I am forced to listen to three stations owned by the same corporation and that's certainly not what I want to look forward to.
